DETAILED ACTION

Allowable Subject Matter

1. Claims 1-22 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art fails to disclose a cooling device for an associated x-ray tube comprising: a fluid inlet; a hollow cover member in fluid communication with the inlet, the cover member: including a wall which defines an aperture sized for receiving a portion of the associated x-ray tube therethrough, defining, at least in part, an interior annular flow path for cooling fluid to circulate around the portion of the associated x-ray tube, and providing at least one fluid outlet through which cooling fluid exits the cover member at a plurality of locations around the portion of the associated x-ray tube, as claimed in claim 1. Claims 2-22 are allowed due to their dependency on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Neumeier et al. (USPN 6,977,991 B1) disclose a cooling arrangement for an X-ray tube, but do not disclose a cover member including a wall which defines an aperture sized for receiving a portion of the associated x-ray tube therethrough, defining, at least in part, an interior annular flow path for cooling fluid to

circulate around the portion of the associated x-ray tube, and providing at least one fluid outlet through which cooling fluid exits the cover member at a plurality of locations around the portion of the associated x-ray tube.
